

## Special Issue

# Cooperative Localization Performance for IoT WSNs

### Message from the Guest Editors

GNSSs have become extremely valuable positioning infrastructure for many applications worldwide, such as UAVs and autonomous driving. In open areas, high-precision positioning can be achieved using well-known technologies such as RTK and PPP. However, in urban environments, due to the severe multipath and blockage of satellite signals, accurate GNSS positioning is extremely difficult. Wireless sensor network technologies such as V2X, Wi-Fi, BLE network, 5G and UWB have attracted a great deal of attention because they can enhance the positioning performance. New methods for fusing these sensors are urgently needed to meet the accuracy, integrity and reliability requirements. This Special Issue aims to provide contributions on advancing accuracy and improving integrity using WSNs. Potential topics include but are not limited to: Measures for accuracy, integrity and reliability improvement; Calibration and modelling of different positioning sensor errors; Algorithms for sensor fusion; Integrity monitoring of GNSSs and other augmentation systems; RAIM, SBAS and GBAS; PPP and RTK; Cooperative positioning; Smartphone positioning; GNSS multipath mitigation; High-precision positioning.

### Guest Editors

Dr. Duojie Weng

1. Department of Land Surveying and Geo-Informatics, The Hong Kong Polytechnic University, Hong Kong 999077, China

2. Research Institute for Artificial Intelligence of Things, The Hong Kong Polytechnic University, Hong Kong 999077, China

Dr. Cheng Yang

School of Land Science and Technology, China University of Geosciences Beijing, Beijing 100083, China

### Deadline for manuscript submissions

closed (15 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
