Large Language Models for Conversational Information Processing and Retrieval

Message from the Guest Editors

Large Language Models (LLMs) have revolutionized the field of conversational information processing and retrieval, marking a significant leap in how machines understand and generate human language. The importance of this research area is profound, as it underpins advancements in virtual assistants, customer service bots, and sophisticated tools for information retrieval. LLMs like GPT-4 have become indispensable in interpreting queries and providing accurate information. As such, the ongoing research and development in LLMs are crucial for pushing the boundaries of artificial intelligence and making technology more responsive and useful to human needs. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but may not be limited to) the following:

- LLMs for dialogue and interactive systems;
- LLMs for dialogue resources and evaluation;
- LLMs for user modeling and simulation in conversations;
- LLMs for the conversational interface of NLP tasks;
- LLMs for interactive information retrieval.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
