

Special Issue

Advancements in Radar Signal Processing

Message from the Guest Editors

This Special Issue will summarize the innovative and breakthrough high-level research results in the field of radar signal processing, cover the advanced techniques in this field, and look forward to the development direction of this field in the future.

- New radar systems;
- Array signal processing;
- Radar imaging technology;
- Radar interferometry;
- Radar jamming/anti-jamming technology;
- Radar detection and tracking methods;
- Target identification and recognition;
- Waveform design and optimization;
- Radar early warning detection technology;
- Artificial intelligence applied in radar;
- Other emerging techniques;
- Radar applications.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
