

Special Issue

Cyber Physical Fusion-Based Defect Perception, Fault Diagnosis, and Reliability Analytics in Power Systems

Message from the Guest Editors

www.mdpi.com/journal/electronics/special_issues/1ATE5P91JS This Special Issue seeks to solicit original research articles as well as review articles. Potential topics include, but are not limited to:

- Advanced digital signal processing methodologies for big data to solve the Prognostic and Health Management (PHM) problem of power equipment;
- Real-time defect detection and performance evaluation based on physical information for critical components in power generation scenarios;
- Data-driven health indicator and threshold representation methodologies for fault detection, diagnosis, and isolation;
- AI-based approaches for fault diagnosis of renewable power generation plants;
- Advanced fault informative feature (e.g., time-domain analysis and time–frequency domain) representative methods for local defect detection;
- Spectrum-based capability evaluation of noise disturbance robustness, and weak diagnostic signal enhancement;
- Applications of AI techniques to imbalanced fault label recognition, and fault diagnosis problems under small sampling data;
- Big data analysis and processing of the PHM of power equipment combined with Industrial IoT.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
