Special Issue

Real-Time Monitoring and Intelligent Control for a Microgrid

Message from the Guest Editors

The global transition toward sustainable energy systems and a deregulated electricity market has accelerated the adoption of microgrids as essential components of smart power infrastructure. This Special Issue invites original contributions and review papers on emerging trends and innovations in real-time monitoring and control of microgrids. Topics of interest may include, but are not limited to, the following:

- Device-level voltage and frequency control.
- System-level optimal and rule-based dispatch.
- Seamless transition between grid-connected and islanded modes.
- Operation, planning, and design of microgrid system.
- Distributed energy resource management systems (DERMSs) and virtual power plants (VPPs).
- Artificial intelligence and machine learning for microgrid applications.
- Smart metering, communication, and cybersecurity for microgrids.
- Real-time simulation and hardware-in-the-loop testing for microgrids.
- Case studies and real-world implementations of microgrid controllers.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
