## Machine Learning and Optimization for Energy Management Systems in Smart Grid

## Message from the Guest Editors

The penetration of distributed renewable energy has recently increased rapidly, and energy management in smart grids is becoming more and more difficult because of the stochastic energy source and flexible resources. Managing these kinds of energy resources efficiently is a significant scientific problem. Consequently, this Special Issue aims to present the most recent advances related to the current research and future development in machine learning and optimization methods for energy management systems in smart grids.

- Machine learning methods for energy management system scheduling;
- Power electronics application in a smart grid;
- Machine learning and optimization techniques for sharing energy and energy trading;
- Machine learning and optimization techniques for energy storage systems;
- Machine learning and optimization techniques for integrated energy systems;
- Future and review of machine learning techniques used in smart grid.

## About the Journal

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Editor-in-Chief

Prof. Dr. Flavio Canavero Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and Systems Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the second half of 2024).
