# Advanced Communication and Networking Techniques for Artificial Intelligence of Things (AloT)

### Message from the Guest Editors

Artificial Intelligence of Things (AloT) is considered a collaborative application of Artificial Intelligence (AI) and the Internet of Things (IoT). With the fast growth of Internet of Things (IoT), vehicular networks, and the advent of 5G/6G, there are more rigorous performance requirements (e.g., ultra-low latency and ultra-high reliability) for advanced communication and networking techniques that enable the emerging high mobility applications. Future AloT systems will provide intelligent wireless connections with a high data rate for anyone at anytime and anywhere with the aid of AI, for example when traveling in high-speed trains and highway vehicles. These high mobility scenarios result in rapidly time-varying channels, which pose urgent demands for Al-empowered large-scale communications as well as significant challenges for the design of communication and networking models and technologies for AloT. Manuscripts should be submitted online at: www.mdpi.com/journal/electronics/special\_issues/25DI EG6924 We look forward to receiving your contributions.

### **About the Journal**

### Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
