

## Special Issue

# Computer Vision Applications for Autonomous Vehicles

### Message from the Guest Editors

Computer vision (CV) methods are extensively utilized by engineers to address a variety of practical vision challenges. We urge researchers to share their experimental and theoretical findings, focusing on the practical application of CV techniques to autonomous vehicles such as cars, drones, robots, and more across all scientific and engineering domains. Papers submitted should highlight innovative applications of CV in real-world engineering contexts related to autonomous vehicles. There are no limitations on paper length. If electronic files or software detailing calculations or experimental processes cannot be conventionally published, they can be provided as supplementary digital content. The focal points of this Special Issue include but are not limited to innovative applications of:

- Image and video interpretation;
- Video analysis and captioning;
- Image retrieval;
- Image enhancement;
- Vision-based robotics;
- Sensor fusion;
- Multimedia;
- 3D reconstruction and localization;
- Object detection and tracking;
- Event prediction.

---

### Guest Editors

Dr. Yuseok Ban

School of Electronics Engineering, College of Electrical & Computer Engineering, Chungbuk National University, Cheongju 28644, Republic of Korea

Dr. Kyungjae Lee

School of Artificial Intelligence, Yong In University, Yongin 17092, Republic of Korea

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
