

# Special Issue

## Enhancing Security in Software-Defined Networking-Enabled Vehicular Networks

### Message from the Guest Editors

This Special Issue aims to achieve the best of both worlds by introducing the structure and manageability of SDNs to the ad hoc world of VANETs. Just as annotations overlay satellite images to mark roads for easier planning, we research overlay SDN architectures over VANETs to coordinate the network traffic and ensure the communication guarantees that modern applications (such as cooperative intersection crossing) require. Topics include, but are not limited to:

- Architectures for software-defined vehicular networks (SDVNs);
- Security aspects of software-defined vehicular networks;
- Logically centralized and distributed strategies in software-defined vehicular networks;
- Machine learning strategies for software-defined vehicular networks;
- Low latency in software-defined vehicular networks;
- Integration of SDN and vehicular cloud computing.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPIPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
