

Special Issue

Advances in Cryptography and Blockchain for Securing Modern Smart Communications

Message from the Guest Editors

The increased automation in modern smart environments are changing our activities of daily life as well as various industrial processes. Recent emerging communication technologies including 5G/6G, Internet of Things (IoT), Internet of Drones (IoD), and Internet of Everything (IoE) facilitate the development of various smart places, including smart homes, smart hospitals, smart farms, smart factories and smart cities. Problems have arisen related to information security and the data privacy of communicating entities (users, servers, IoT devices, etc.) in the systems.

At present, there is a lack of sufficient research works integrating cryptography techniques and blockchain in a single design with the aim of addressing the issues described above. This Special Issue is seeking innovative cryptographic methods, tailored blockchain designs, or works integrating cryptography and blockchain in design with the aim of assuring security and privacy in systems.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
