

## Special Issue

# Advanced Machine Learning Technologies and Their Applications in Intelligent Imaging and Image Processing

### Message from the Guest Editors

Intelligent imaging and image processing is one of the fundamental tasks in the area of machine learning and artificial intelligence. Despite the promising results achieved using advanced machine learning technology and their increasing number of related applications and achievements, there remain several unsolved challenges regarding their practical applications, such as efficient image prior modeling, fast and robust large-scale optimization algorithms, etc. There is ample room for improvement in contemporary theories and methodologies for intelligent imaging, image processing, and their applications. The aim of this Special Issue is to discuss new machine learning technologies and their applications in intelligent imaging and image processing. The topics include but not limited to new deep learning techniques; low-level image processing, restoration, and enhancement; intelligent sensing systems; signal processing; multi-sensor imaging fusion; and high-level image visions including image classification and recognition.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
