

## Special Issue

# Next-Generation Security Solutions for the Internet of Secure Things (IoST)

### Message from the Guest Editor

The Internet of Things (IoT) has rapidly transformed sectors such as healthcare, transportation, industrial automation, critical infrastructure, and smart cities. However, IoT is highly vulnerable to cyber threats. To address these challenges, the Internet of Secure Things (IoST) as a security-focused paradigm is introduced and designed. This Special Issue especially aims to explore innovative IoST solutions. The topics include but are not limited to:

- Lightweight cryptography for resource-constrained IoST devices;
- Quantum-resistant cryptography for future-proof IoST security;
- Blockchain-based security for IoST networks;
- AI/ML for IoST security and anomaly detection;
- Decentralized trust models and privacy in IoST;
- Vulnerability detection and mitigation strategies for IoST;
- Secure key management and authentication in large-scale IoST systems;
- Zero-trust architecture for IoST networks;
- Decentralized learning for secure and private IoST data analysis;
- Energy-efficient security solutions for IoST;
- Cyber-physical system (CPS) security in IoST;
- AI-based threat detection and response for IoST security;
- Secure data sharing and storage management for IoST.

### Guest Editor

Dr. Debashis Das

Department of Computer Science and Data Science, Meharry Medical College, Nashville, TN 37208, USA

### Deadline for manuscript submissions

15 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
