The Progress in Application-Specific Integrated Circuit Design

Message from the Guest Editors

Application-Specific Integrated Circuits (ASICs) are custom-designed integrated circuits tailored to meet the needs of specific applications. They represent the cutting-edge applications of semiconductor technology. Optimized for particular tasks, ASICs can offer higher performance, lower power consumption, and cost-effectiveness while reducing the overall complexity of systems. This specialized nature makes ASICs crucial in critical areas such as high-performance computing, mobile communications, digital media, automotive electronics, and medical devices. ASICs are an indispensable part of modern electronic systems. They drive technological progress and greatly enrich and facilitate people's daily lives.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
