

Special Issue

Recent Advances and Related Technologies in Neuromorphic Computing

Message from the Guest Editors

Neuromorphic computing, inspired by biology and mimicking the neural systems of the human brain, promises extraordinary performance and energy efficiency. In addition to this, neuromorphic computing is ideally suited to low-power edge AI applications. This Special Issue aims to explore the recent advances, challenges, and related technologies in the field of neuromorphic computing. Original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:

- Memristive devices for neuromorphic computing;
- Dynamics of nonlinear systems;
- Dynamic memories on memristor-based circuits and systems;
- Emerging technologies for neuromorphic computing;
- Computational neuroscience;
- Mathematical modeling of neural systems;
- Neurodynamic optimization and adaptive dynamic programming;
- Embedded neural systems;
- Hybrid intelligent systems supervised;
- Robotic and control applications.

Guest Editors

Dr. Gang Dou
Prof. Dr. Mei Guo
Dr. Zhixia Ding

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
