Selected Papers from Young Researchers in Computer Science & Engineering

Message from the Guest Editors

The advancement of the state-of-the-art in Computer Science & Engineering is achieved by disseminating new discoveries and results obtained in the work developed by its researchers. This Special Issue aims to promote and disseminate works developed by young researchers in several areas covered by computer science and engineering, such as Internet of Things, Industry 4.0, smart cities, smart grids, smart agriculture, cloud computing, edge computing, fog computing, artificial intelligence, machine learning, deep learning, blockchain, deep tech, distributed computing, emotional systems, Fintech and intelligent textiles, among other technologies in this field.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
