Robot-Vision-Based Control Systems

Message from the Guest Editors

Robot vision is the prime channel to perceive the surrounding environment and identify the work object for the robot. Guided by visual perception technology, it realizes the perception and fusion of information from one-dimensional, two-dimensional to multi-dimensional, achieving fast and accurate environmental perception and object recognition. Topics for this Special Issue include, but are not limited to, the following: (1) Innovative robot vision sensors; (2) Intelligent vision detection; (3) Augmented, virtual and mixed reality (AR/VR/MR); (4) Simultaneous localization and mapping (SLAM); (5) Vision-based human–robot interactions; (6) Visual servo control.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
