

Special Issue

Monitoring, Diagnosis, and Prognostics for Power Industry Devices

Message from the Guest Editors

Recent decades have seen an increase in the complexity of production systems due to higher requirements for profitability. Currently, thanks to the progress in information technology, automation and telecommunications, the industry 4.0 revolution is taking place. The Internet of Things, Digital Twins technology, Artificial Intelligence and Machine Learning support the intelligent processing of huge amounts of operational data of technological processes. This is a completely new basis for monitoring, diagnostics and prognostics of energy devices. In order to create a space for sharing experiences in this new and dynamically developing research field, the Special Issue is devoted to the diagnosis of power systems and devices. Topics of interest for publication include, but are not limited to

- Power boilers diagnostics;
- Combustion engines diagnostics;
- Steam, gas, water and wind turbines diagnostics;
- Power generators diagnostics;
- Energy storage systems diagnostics;
- Operation and maintenance control of heat power plants;
- Operation and maintenance control of nuclear power plants;
- Operation and maintenance control of renewable energy systems.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
