Explainable AI: Methods, Applications, and Challenges

Message from the Guest Editor

The growing application of the usage of artificial intelligence (AI) techniques for different applications in various sectors (including network security, autonomous driving, IoT systems, medical domain, and among others) opens new research directions in this research area. However, most existing research has primarily concentrated on the classification accuracy of different AI algorithms without offering insights into their underlying behaviour and decision-making processes. This constraint highlights the urgent need to better utilize the relatively new domain of explainable AI (XAI) to enhance the clarity of AI decisions in these different domains. XAI is essential for building trust, transparency, and accountability in AI systems, particularly in applications where decisions have high-stakes implications. There are several challenges for such usage of XAI, including generating accurate global and local explanations of AI models, discovering the main features that affect the decision-making of each AI model, and evaluating different classes of XAI models to test for trust in their applicability.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
