# Advances in Quantum Machine Learning (QML)

#### Message from the Guest Editors

Quantum machine learning is an emerging interdisciplinary field that has developed rapidly in recent years, combining the advantages of quantum computing and machine learning, aiming to improve the performance and efficiency of machine learning algorithms through utilizing the characteristics of quantum computing. The development of quantum machine learning includes, among others, the following aspects: 1. Quantum neural networks and guantum classifiers; 2. Quantum optimization algorithms; 3. Quantum kernel method and guantum support vector machine: 4. Quantum-generated adversarial networks In addition to the above advances in its application, the field of quantum machine learning has also made important theoretical breakthroughs. Overall, the field of quantum machine learning has made remarkable progress over the past few years, but still faces many challenges and unresolved problems. With the continuous development and improvement of quantum computing technology, it is believed that quantum machine learning will play an important role in more fields in the future, bringing breakthroughs and opportunities for the development of artificial intelligence.

# About the Journal

# Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Editor-in-Chief

Prof. Dr. Flavio Canavero Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

# **Author Benefits**

# **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
