

## Special Issue

# AI, IoT, and NN Use in HealthCare

### Message from the Guest Editors

The aim of this Special Issue is to present the current activity in this research field and its results, linking the promotion of health and well-being resulting from healthcare, physical activity and involvement in sport with AI tools such as IoT and NN. Topics of interest include:

- The use of AI, IoT and NN devices and systems in healthcare, physical activity and sports;
- The accuracy and volume of data recording;
- Privacy and security in the collection, use and communication of biomedical data;
- Usability and users' experience of devices;
- Applications and systems for personal or public use in PA and healthcare;
- Monitoring, diagnostics and prevention applications and systems;
- Privacy, security and law of biomedical data.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
