

## Special Issue

# AI Models for Human-Centered Computer Vision and Signal Analysis

### Message from the Guest Editor

Signal, image, and video analysis dealing with the detection, recognition, and identification/verification of humans and human-related events, such as gestures, actions, or speech, has over the years moved from sole academic interest into industrial research and technological practice. This process results in steady improvements of sensors and fast-growing power of computational hardware and in maturing of computational techniques. Aim of the Special Issue is to present AI-based techniques, both classic machine learning and deep learning models, for the analysis of human-related digital data (e.g., processing, segmentation, feature extraction, and object/fake/fraud/health detection/classification/identification) acquired by various sensors (cameras, microphones, or touch) and wearable sensors or medical devices. Research area may include (but not limited to) the following:

- Biometrics.
- Human pose and action classification.
- Human-machine interaction by gestures and voice.
- Human sensor acquisition and data analysis.
- Fake detection in image, speech, and video.
- Surveillance video analysis.
- Security related data analysis.
- Wearable signal analysis.
- Health monitoring.

### Guest Editor

Prof. Dr. Włodzimierz Kasprzak

Faculty of Electronics and Information Technology, Institute of Control and Computation Engineering, Warsaw University of Technology, Nowowiejska 15/19, 00-665 Warsaw, Poland

### Deadline for manuscript submissions

15 February 2026

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
