Advances in Biomedical Imaging and Processing

Message from the Guest Editors

The purpose of this Special Issue is to publish cutting-edge research contributions (original and review articles) covering advances in biomedical imaging. This Special Issue will contribute to improving diagnostic accuracy and maximizing treatment efficiency through biomedical imaging. This scope includes advances in biomedical imaging systems (i.e., clinical or preclinical imaging modalities, tomographic or microscopic imaging systems) and associated signal or image processing (e.g., signal/image quality improvement, image reconstruction, computer-aided analysis). Furthermore, we welcome studies related to biomedical imaging using contrast agents and various preclinical/clinical applications.
