

## Special Issue

# Ultra Low Power Integrated Circuits for IoT

### Message from the Guest Editors

This Special Issue aims to cover emerging trends and techniques to design ultra-low-power integrated circuits and to attract original research outcomes related to ultra-low-power, ultra-low-voltage, digital-based, and fully synthesizable circuits to enable the next generation of IoT devices. The topics of interest include, but are not limited to:

- Ultra-low-power signal conditioning circuits for IoT;
- Energy-efficient analog and mixed-signal circuits;
- Power/voltage scalable analog and mixed-signal circuits;
- IC solutions for ultra-low-voltage, energy, and standby power consumption systems;
- Energy harvesting and power management circuits for IoT devices;
- Ultra-low power circuit design techniques for a variety of IC building blocks such as amplifiers, voltage and current references, analog filters, data converters, and voltage regulators;
- Ultra-low-power hardware architectures for energy-constrained devices;
- Ultra-low-power/voltage ICs for instrumentation and communication applications.

---

### Guest Editors

Dr. Paulo César C. De Aguirre

Dr. Orazio Aiello

Dr. Elisabetta Moiselto

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
