

Special Issue

Applications of AI and Data Analytics in Sensitive Smart Environments

Message from the Guest Editor

This Special Issue will include studies investigating the application of innovative AI and data analytics techniques to sensitive smart environments in order to improve the security and privacy of the users and understanding and transparency of internal system operations. The topics of interest include, but are not limited to, the following:

Explainable artificial intelligence;
Real-world data analytics;
Complex data visualization;
Pervasive technology acceptance;
Pervasive sensitive services;
User-centered security for sensitive smart environments.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.
