New Insights and Techniques for Neural Networks

Message from the Guest Editors

In recent years, there has been a significant increase in the volume, veracity, and variety of machine learning applications. This has led to growing challenges and new possibilities for researchers to effectively extract hidden features in a broad range of scientific and engineering fields. The success of deep learning comes primarily from the availability of algorithms, large data, and computer power. Neural networks in particular have become an essential part of artificial intelligence and machine learning and are applied to a wide range of applications, including medical imaging, computer vision, speech signal processing, robotics, and more. Through the interconnection of nodes and a learning process, neural networks have a unique ability to extract meaning from complex or imprecise data. These networks have the potential to enhance measurements in a diverse range of research fields, and there is a need for in-depth investigations of neural networks-related topics to implement effective, cost-competitive, and practical solutions.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
