

Special Issue

Digital Interventions for Older Adults and People with Disabilities

Message from the Guest Editors

In the past decade, a huge number of mobile applications and telehealth systems have been created for healthcare purposes. However, the number of mobile health apps and telehealth systems created specifically for older adults and people with disabilities are limited.

In this Special Issue, we want to collect studies in this area in particular. Contributions to the issue can be mobile apps or telehealth/eHealth interventions for older adults and people with disabilities. They can also be investigations into related areas—for instance, studies about the accessibility of mobile health apps and telehealth/eHealth, usability studies, feasibility studies, and related security and privacy issues. In recent years, researchers have begun to incorporate machine learning into these systems, so that the digital intervention can be personalized by dynamic adjustment and customization based on the specific context and needs of patients. Contributions to this issue can be original research studies or review articles. This Special Issue will house a collection of the current state of the art in this area, which can be used to guide further relevant studies.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
