

## Special Issue

# Unmanned Vehicles Systems Application

### Message from the Guest Editors

The Unmanned Aerial Vehicles (UAVs) and broader Unmanned Vehicles (UVs) market has significantly expanded, with increased commercial use in civilian applications like search and rescue, telecommunications, aerial photography, and disaster management. UVs operate without human intervention and are controlled remotely by radio control or automated guidance. A robust wireless communication system is essential for successful UV deployment. Additionally, UVs are advancing rapidly toward autonomous operations, marking a major technological leap in the industry. This special issue highlights advances in autonomy, reliability, and safety for UVs, with a focus on communication applications. Topics of interest include, but are not limited to:

- Navigation and control algorithms
- Autonomy and decision-making
- Perception and multi-sensor fusion
- Networked swarms
- Trajectory planning
- Resource allocation
- Data collection
- Network coverage
- Positioning optimization
- Physical layer security
- AI-based jammer detection and anti-jamming
- AI-based spoofer detection and anti-spoofing
- Emerging applications of UAV communications

### Guest Editors

Dr. Ali Krayani

Department of Electrical, Electronics and Telecommunication Engineering and Naval Architecture (DITEN), University of Genoa, 16145 Genoa, Italy

Dr. Atm Shafiul Alam

School of Electronic Engineering and Computer Science Queen Mary University of London Mile End Road, London E1 4NS, UK

### Deadline for manuscript submissions

15 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
