

Special Issue

Advances in Text Mining and Analytics

Message from the Guest Editors

This Special Issue aims to present the latest research and developments in text mining and analytics, including new methods and techniques with recent advancements in machine learning, natural language processing, and artificial intelligence. Applications of text mining and analytics techniques in different contexts are also welcomed, such as sentiment analysis, web mining and social network analysis, topic modeling, named entity recognition, biomedical literature mining, and healthcare informatics. Topics of interest include but are not limited to the following:

- Natural language understanding
- Information retrieval and extraction
- Generative AI
- Document topic modeling
- Knowledge discovery in text
- Language modeling
- Recommender systems
- Knowledge networks and graphs
- Named entity recognition and entity linking
- Document semantic extraction and relation extraction
- Sentiment analysis, opinion, and argument mining
- Text summarization
- Question answering systems
- Development of software for text mining and analytics
- Applications of text mining and analytics

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
