

## Special Issue

# AI in Information Processing and Real-Time Communication

### Message from the Guest Editors

The scope of this Special Issue includes, but is not limited to: The theory and methods of image, speech, and video processing based on artificial intelligence; application-oriented multimedia processing; Big data and intelligent processing; Application-oriented speech processing; Time-sensitive network-related research content including theories and methods of time synchronization, clock synchronization, data scheduling, network configuration, traffic scheduling, simulation and verification of networks and reliability, as well as application-oriented deterministic transmission.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
