

Special Issue

Artificial Intelligence Application on Intelligent Transportation System

Message from the Guest Editors

The Intelligent Transportation System (ITS) stands as a comprehensive and expansive transportation and management system, encompassing a multitude of domains. Its central focus lies in the intricate interplay between people, vehicles, and road infrastructure, harnessing the capabilities of information technology to elevate traffic efficiency and safety. As artificial intelligence (AI) technology continues to advance, the manifold applications of AI have made significant strides in enhancing the efficiency, safety, and sustainability of transportation networks within the ITS paradigm. AI has emerged as a pivotal force in addressing the intricate challenges posed by the future of urban transportation. Amidst the myriad constituents of ITS, the ongoing trend towards the smartification of transportation infrastructure (including roads, bridges, tunnels, and more) and the relentless pursuit of autonomous driving technology in vehicles stand out as current focal points in ITS research. This Special Issue endeavors to compile the latest applications of artificial intelligence technology in both intelligent transportation infrastructure and autonomous driving.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
