

## Special Issue

# Future Communication Networks and Systems for Smart Cities

### Message from the Guest Editor

Building and creating smart homes and cities have benefited greatly from a number of major enabling technologies, many of which are still in use today. The increased reliance on city residents in smart ICT applications will bring a tremendous increase in the amount of traffic that will be produced in the city of the future, thus straining the limits of current data communication networks. In this Special Issue, articles addressing new challenges and solutions for the network infrastructure of smart cities of the future are invited. Authors are encouraged to submit articles mainly describing original research or review articles. Representative topics that this SI will consider include (but are not limited to) the following:

- Smart city communications infrastructure;
- Ubiquitous sensing and actuation;
- IoT architectures, protocols, and algorithms in smart cities;
- Reliability, security, safety, privacy and trust issues;
- Intelligent transportation systems and vehicular networks;
- Smart energy grid;
- Smart homes for elderly citizens;
- Crowdsensing and crowdsourcing.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the second half of 2025).
