

Special Issue

Interpretability and Analysis of Models for Natural Language Processing

Message from the Guest Editors

In recent years, the rapid development of pre-trained model technology has profoundly transformed the fields of information retrieval (IR) and natural language processing (NLP). This Special Issue seeks to compile cutting-edge research contributions focused on the interpretability and analysis of models within the NLP domain, addressing the following topics, as well as others:

- Theoretical frameworks for model interpretability;
- Techniques for explaining the behavior and decisions of NLP models;
- Analytical methods for probing and understanding pre-trained models;
- Cross-disciplinary approaches combining IR and NLP for improved interpretability;
- Advances in conversational AI with a focus on transparency;
- Improved retrieval and ranking techniques through interpretable models;
- Innovations in knowledge acquisition and representation learning;
- Evaluation metrics and benchmarks for model interpretability.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
