

Special Issue

Microservices: Design, Programming, and Operations

Message from the Guest Editors

Microservices are being increasingly adopted in enterprise IT, as many large companies have embraced these architectures to deliver software services to their users. Microservices constitute an alternative to traditional software architectures and offer several advantages, such as enhanced adaptability, scalability, and resilience to failures. Furthermore, microservices facilitate expedited and more streamlined development processes, while promoting cross-collaboration among DevOps teams. As the technological landscape evolves and grows more intricate, the significance of microservices in constructing scalable and efficient applications is evident.

This Special Issue precisely aims at collecting original contributions on topics related to the design (e.g., software engineering, best practices and patterns, formal analyses/models), programming (e.g., languages, testing, DevOps techniques), and operations (e.g., management/orchestration, security, AIOps) of microservice-based applications, and on their future development and impact. Other topics of interests can be found in the call for papers available at: <https://www.conf-micro.services/2023/>

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
