

## Special Issue

# Modeling and Optimization of Energy Efficiency in the Light of Energy Security

### Message from the Guest Editors

Energy security is currently one of the most important issues for political, environmental, and economic reasons. To ensure this type of security, it is necessary to transform the energy systems of countries around the world. An important aspect of obtaining energy security when using renewable energy sources is the possibility of storing the generated energy and the stable operation of energy systems. We would like the proposed Special Issue to give scientists from various fields an opportunity to present the results of their research within the framework of broadly understood energy security. The submitted manuscripts may relate to energy security in the field of modeling, simulation, and optimization, among others:

- Energy storage;
- Processing of materials, obtaining critical raw materials (e.g., REE) for energy production;
- Saving energy;
- Renewable energy;
- Electric vehicles, modern engines, etc.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
