

## Special Issue

# Advances in Routing and Scheduling Technology

### Message from the Guest Editors

Routing and scheduling technology serves as a building block in various types of networks. The efficiency of a routing and scheduling scheme significantly affects the quality of service (QoS). However, the rapid evolution of network technologies and the increasing demand for efficient data transfer and processing makes it challenging to design an efficient routing and scheduling scheme. This Special Issue will explore recent advancements in routing and scheduling technologies, showcasing cutting-edge research and innovative solutions that address current challenges and anticipate future trends. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Time-varying routing and scheduling;

Energy-efficient routing and scheduling;

Delay deterministic routing and scheduling;

Scalable routing and scheduling;

High-throughput routing and scheduling;

Application-driven routing and scheduling;

Routing and scheduling for AI;

Routing and scheduling for VR/AR;

Robust routing and scheduling;

Advanced routing and scheduling protocol.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
