

## Special Issue

# Compiler and Hardware Design Systems for High-Performance Computing

### Message from the Guest Editors

Compilers and computer architecture are both critical components of modern computing systems because their significance lies in their essential roles in making software and hardware work together efficiently and effectively. Compilers enable developers to write code in higher-level languages and convert it into machine code, making programming more accessible and efficient. Therefore, compilers and computer architecture both play a critical role in enhancing modern computing technology given that high-performance parallel architectures are exploited to solve many critical challenges in a variety of areas. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- High-performance computer architectures;
- IoT, mobile, Edge, and embedded architectures;
- Compilers, runtimes, and programming languages for parallel computer systems;
- Compilers and programming languages for novel architectures;
- Heterogeneous computing accelerators;
- Machine learning compilers and runtime;
- Programming languages for machine learning;
- Specialized hardware for machine learning.

---

### Guest Editors

Dr. Jinsung Kim

School of Computer Science and Engineering, Chung-Ang University,  
Seoul 06974, Republic of Korea

Dr. Jaehwan Lee

Department of Computer Science and Engineering, Kongju National  
University, Cheonan 31080, Republic of Korea

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
