# Special Issue

# Analog Integrated Circuits in Edge Computing

### Message from the Guest Editors

The main goal of this Special Issue is to present effective implementations of analog integrated circuits, hardware-oriented algorithms, design methods, and optimizations of CMOS circuits aimed at processing analog data close to the source. Today, such solutions are particularly desirable in medical applications, implantable chips, low-power electronics, human energy harvesting, autonomous distributed systems, wearable devices, etc. The topics of interest include, but are not limited to:

- Mixed-signal integrated circuits;
- Analog CMOS preprocessors and accelerators;
- Field-programmable analog array (FPAAs), analog IPcores:
- Edge AI, CMOS implementation of neural networks;
- Sensor data analysis, sensor techniques;
- Hardware-oriented algorithms for analog signal processing;
- Low-power IC, weak-inversion mode, moderateinversion mode;
- Optimization and design automation of analog CMOS circuits:
- Analog-to-digital Converters, ∑∆ modulators.

### **About the Journal**

### Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

#### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
