

Special Issue

Towards Native-AI and Open 5G and B5G Networks

Message from the Guest Editors

This Special Issue will cover all aspects related to the above topics, including hardware, software, and algorithmic developments. Topics include but are not limited to:

- The native and massive application of AI in open RAN networks
- New flexible architectures
- Network Digital Twins
- Satellite and HAPS (High Altitude Platform Station) cellular integration
- Cybersecurity
- Quantum cryptography communications, among others.

Welcome to your contributions.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.
