# Artificial Intelligence Solutions and Applications for COVID-19 Pandemic

### Message from the Guest Editors

For this Special Issue, we invite you to submit high-quality research on emerging solutions and/or applications based on AI techniques, such as machine learning, that address the recent challenges caused by COVID-19. Topics of interest include but are not limited to the following:

- Application of artificial intelligence for COVID-19;
- Application of machine learning algorithms for COVID-19;
- Condition monitoring, prognosis, and diagnosis of COVID-19 patients using AI techniques;
- Internet of Things (IoT) devices with application in intelligent systems for COVID-19;
- AI applications in image processing to detect abnormalities (e.g., pulmonary) using X-rays to provide diagnoses of potential COVID-19 cases;
- AI-enabled robots to minimize human-to-human contact;
- AI applications for contact tracing;
- Management solutions for large volumes of data (big data); and
- Pandemic data management and visualization systems.
