

Special Issue

Analog AI Circuits and Systems

Message from the Guest Editors

In the past few years, we have seen great resurgence of artificial intelligence (AI), thanks to the increase in computational resources. Although AI is maturing, it is still challenging to solve the gradient explosion problem caused by long sequence modeling in a neural network, further improve its calculation accuracy and reduce its computational complexity with data-driven applications. On the other hand, since the way we hear and see things is on a continuous wave, an analog circuit makes an electronic representation of our physical world. Analog circuits represent the key components of communications and other systems in widespread, growing commercial use. In recent years, implementing AI algorithms using analog circuits has attracted attention, although AI algorithms have traditionally been developed on graphics processing units (GPUs). This Special Issue invites fundamental and applied research work on all aspects of analog AI circuits and systems, including but not limited to the following topics:

- Artificial neural networks;
- Recurrent neural networks;
- Intelligent computing;
- Machine learning;
- Analog artificial intelligence circuits;
- Analog computing.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Signal Processing)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
