

## Special Issue

# AI for Cyber-Physical Power Systems Operation and Control

### Message from the Guest Editors

Existing power networks are changing rapidly due to the large deployment of non-synchronous integration. Thus, requiring innovative methods that guarantee the system stability. Moreover, Artificial Intelligence (AI) developments are no longer a myth for industry and are the current frontier of research with enormous possibilities of application in power systems. This migration to AI implementation requires the combination of different research areas and a deep study that helps the Transmission/Distribution System Operators (TSO/DSOs) to provide continuous operation and control. Authors are welcome to contribute in the following topics: - Low-inertia power systems - Power system dynamics - Applied power systems control theory and Machine Learning - Power dominated converter systems - Recent advancements in DC/AC microgrids - Renewable energy - Anomaly detection - Smart power technologies - Data-driven methods - Optimization in power and distribution systems

### Guest Editors

Dr. Harold Rene Chamorro Vera

KTH Royal Institute of Technology, 114 28 Stockholm, Sweden

Prof. Carolina de Mattos Affonso

Faculty of Electrical Engineering Federal University of Pará—UFPA Belem, PA 66075-110, Brazil

### Deadline for manuscript submissions

closed (30 November 2022)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
