

## Special Issue

# Power Development and Power Generation

### Message from the Guest Editors

This Special Issue of *Electronics* aims to address the challenges in the control design and implementation of renewable energy systems used to convert renewable energy in electrical power. For this Special Issue, we welcome original submissions focusing on new control techniques and the practical implementation of these new control schemes, which are useful for improving our knowledge of renewable energy systems, on the basis of one or more of the following topics. The Issue will include, but is not limited to, the following topics:

- Solar photovoltaics (PV);
- Distributed energy storage systems (DESSs);
- Wind energy;
- Hydro power;
- Bioenergy;
- Green hydrogen;
- Fuel cell;
- Ocean wave energy;
- Thermoelectric.
