

Special Issue

The Application of Intelligent Robotics and Smart Machines in Agriculture

Message from the Guest Editors

Dear colleagues, Agricultural robotics has advanced significantly in recent years and is the core on which Agriculture 5.0 is based, together with artificial intelligence (AI). Its introduction in the field is slower than in the industrial sector, but it is necessary in order to meet current and future challenges such as labour shortages, increased production, efficiency in the application of the resources employed, or the improved safety and quality of work. Numerous research projects currently aim to employ robotics in the field to carry out certain tasks such as pruning, the application of phytosanitary products, sowing, harvesting and logistics or simply crop monitoring, as well as employ general-purpose robots that enable various tasks to be carried out via the incorporation of various implements. In this Special Issue, our aim is to collect works related to the application of robotics in the agricultural field. It will address topics such as autonomous machinery, artificial intelligence applied to the performance of tasks, sensor technologies for the improvement of processes, intelligent work methodologies and cloud computing.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
