Digital Transformation in the Agriculture Sector

Message from the Guest Editors

The Food and Agricultural Organization (FAO) of the United Nations has expressed its concern because of growing population and urbanization which has impacted in the global food production. Digital technologies can improve traditional agriculture by reducing water and nutrient consumption, avoiding the need of large crop areas and adjusting environmental parameters as desired, among others. Traditionally, the agriculture sector has integrated digital technologies for managing irrigation systems or forecasting weather conditions, but recent developments in the area of communications, computation and artificial intelligence can further improve areas such as precision agriculture and spread automatic management of crops worldwide. Nowadays, Information and Communication Technologies (ICT) developments and their evolution are transforming the paradigm of agriculture production management providing with more and more precise information allowing the agriculture industry to better understand the behavior and development of the agriculture productions and enabling farmers to meet the requirements that these productions need in each of their stages.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
