Special Issue

Evolutionary Antenna Optimization

Message from the Guest Editors

Evolutionary optimization methods have been used with success in many scientific fields, including computational electromagnetics. The use of evolutionary optimization for antenna design has attracted increasing attention in the last decade and counts many success stories. On the other hand, some challenges are also present, such as the long optimization time due to the computational cost of 3D electromagnetic simulations. This paper call aims to build a bridge between evolutionary algorithms and design procedures of complex electromagnetic structures. In particular, it aims to review the state-of-the-art of evolutionary optimization-based antenna design methods, identify and address key challenges, develop bespoke evolutionary optimization methods for antenna design, as well as promote application to a variety of antennas, e.g., wideband antennas, patch antennas, and antenna arrays, including RF circuit theory and synthesis, and predicting the equivalent circuits of multi-ports network. We also encourage submissions geared towards the use of hybrid optimizations methods.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
