

## Special Issue

# Artificial Intelligent in 5G/6G Research: Radio Frequency, Physical Layer, Networking and Security

### Message from the Guest Editors

With the continuous integration of 5G/6G key technologies and artificial intelligence (AI)-enabling technologies, the performance of the communication system can be significantly improved. It is necessary to achieve important breakthroughs in key technologies of the 5G/6G network. In the future, AI will develop from 5G application towards 6G endogenous intelligence, through multi-domain integration, intelligent adaptation of frequency spectrum, computing, storage, and other multi-dimensional resources. However, the security boundary brought by multi-domain integration is fuzzy, and network security and privacy issues face new challenges. Using AI to realize network self-optimization and improve network security has become a research hotspot. Furthermore, the combination of intelligent industry application with the internet of things is the main trend for the future network development. This Special Issue aims to provide a platform to academia and industry experts to exchange their ideas and publish the latest research trends and results related to AI in 5G/6G research.

### Guest Editors

Prof. Dr. Junhui Zhao

Prof. Dr. Dongming Wang

Dr. Yansha Deng

### Deadline for manuscript submissions

closed (15 January 2024)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
