Special Issue

Blockchain-Based Technology for Mobile Application

Message from the Guest Editor

This Special Issue focuses on mobile blockchain technology and mobile applications that run on mobile and portable devices. We encourage researchers and practitioners that work in the mobile blockchain space to share their problems and solutions, as well as mobile and decentralized applications that utilize blockchain technology. **Keywords**

- Mobile blockchain technology
- Mobile blockchain wallets
- Mobile mining
- Mobile cryptocurrency systems
- Decentralized and peer-to-peer applications
- Decentralized mobile applications
- Decentralized autonomous organizations (DAOs)
- Mobile self-sovereign identity systems
- Mobile blockchains and Sybil attack prevention
- Off-chain transactions in mobile blockchain applications
- Decentralized IDs in mobile applications
- Verifiable credentials in mobile applications

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.
