Big Model Techniques for Image Processing

Message from the Guest Editors

Phones have played important roles in human–computer interactions, and with the development of internet and big data techniques, people have higher requirements for speech quality. This can be addressed by improving the quality of phone hardware, which will however include a higher cost. As an alternative, speech denoising techniques can use speech properties and machine learning to obtain high-quality speech, which can provide assistance to human–computer interactions. Additionally, deep learning has strong learning abilities, and thus, determining how to use deep learning in speech denoising is incredibly important. Topics of interest include but are not limited to the following:

- Speech denoising;
- Machine learning and deep learning;
- CNN

Looking forward to your contribution!!!

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
