

Special Issue

Evolutionary Hardware-Software Codesign Based on FPGA

Message from the Guest Editors

This Special Issue, entitled “Evolutionary Hardware-Software Codesign Based on FPGA”, is intended to present the latest advances in applications, tools, and designs benefiting from this hybrid technology, including (but not limited to):

- Hardware–software codesign for FPGA-based acceleration;
- System and software for FPGA accelerator compilation;
- High-level abstractions and tools for FPGAs;
- AI and ML application based on FPGA implementations;
- RISC-V-embedded cores acceleration;
- Programmable neuromorphic computing architectures using FPGAs;
- Implementation of novel applications based on FPGAs;
- FPGA Implementation of deep neural networks.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
