

## Special Issue

# Recent Advanced Control, Applications, and Optimization for WSN and the IoT

### Message from the Guest Editors

The Internet of Things (IoT) is a popular field of research, with great prospects. The backbone of IoT systems consists of sensors, embedded devices, networks of smart things, etc. Established communication among devices embedded with wireless sensor networks (WSN) and IoT networks improves our quality of life and represents a significant step forward toward automatic systems. WSN and IoT systems are already deployed in various areas. The collaborative processes of sensors or embedded devices faces many complex challenges which will differ from environment to environment. The efficiency and effectiveness of systems depends on physical environment issues, services, system requirements, privacy, heterogeneity, etc. Based on each situation, the networks of sensors or embedded devices need to tackle many different challenges and issues which can be improved, such as quality of services, network dynamic adaptations, network protocols, etc. The main aim of this Special Issue is to compile original and high-quality research works related to innovative solutions in the field of “Advanced Control, Applications, and Optimization for WSN and IoT”.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
